For Immediate Release- Going Green Wins Gold for Artisan Design Group

Artisan Design Group won the Gold Award at The Nationals 2009 for "Best Model between \$ 650,000 - 999,000" for the SkyVue Loft model in the Smart Corner Residential Tower.

This model's corner position soars in a contemporary downtown high-rise in San Diego, providing panoramic views of the city through floor-to-ceiling windows. The finishes and textures of the palette provide a luxurious haven to enjoy the view. Contemporary cabinets and finishes in zebra wood and coordinated glass tile throughout integrate the space. Selected space control choices such as sliding partitions balance a desire for privacy with a sense of openness. Custom interior lighting systems showcase the space. While the SmartLoft design maximizes the square footage in this 1192 sf home, its' merchandising features more than aesthetics – as every choice, from appliances to countertops and flooring, meets green standards, reflecting a commitment to the environment.
